## PRODUCT SPECIFICATIONS

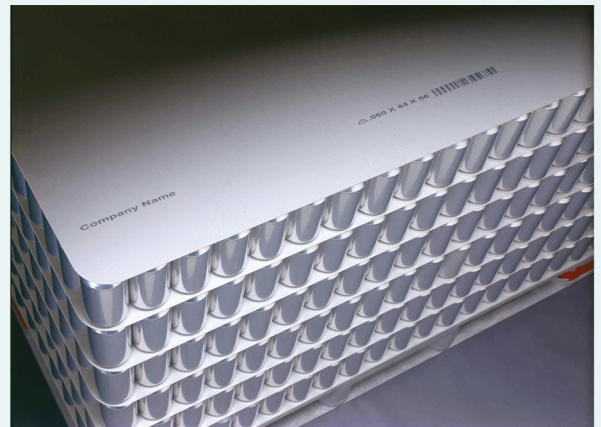

# PLASTIC LAYER PADS

For aluminum and steel cans, plastic and glass bottles and other rigid packaging.

Reusable plastic divider sheets are placed between layers of aluminum, steel, glass and plastic cans or bottles used to package food and beverage products. Solid and corrugated layer pads provide maximum product protection and unit load stability. Washable and reusable divider solution offer increased hygienic properties vs. one way carton layer pads. Layer pads are environmentally friendly and 100% recyclable.

### Overview

- Available in solid and corrugated styles
- Maximum product protection and load stability for unitized loads
- Popular with our 44 x 56 pallet offerings
- Non-sloughing, plastic design reduces product contamination
- Reusable, easily cleanable
- Customer name and logo available for direct printing
- Reduces packaging waste by eliminating fiber sheet disposal.
- 100% recyclable divider sheets
