## PRODUCT SPECIFICATIONS

# Spanish Pallet NV 1120 x 1420

Total system solutions for the food & beverage industry

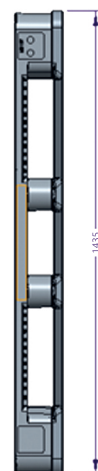

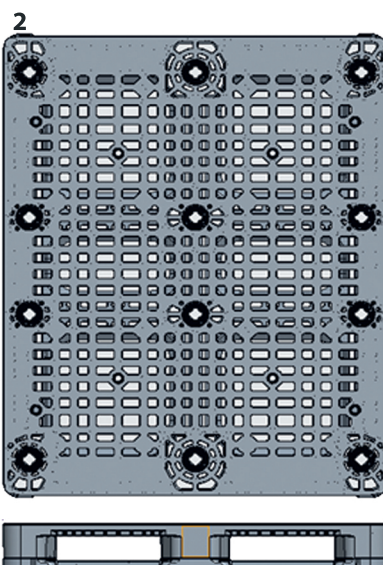

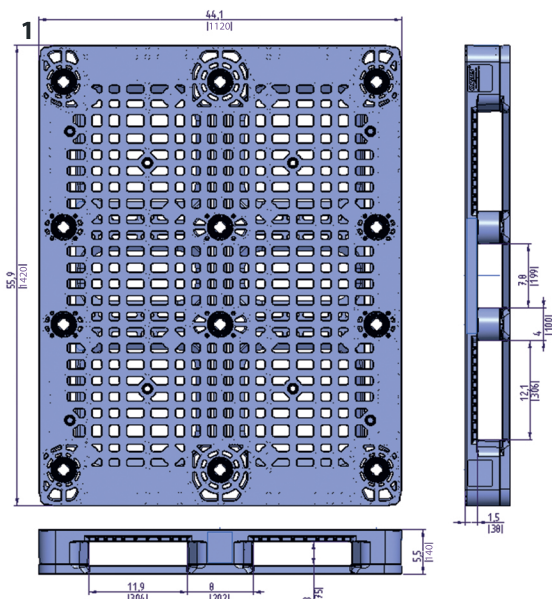

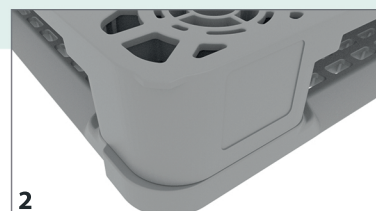

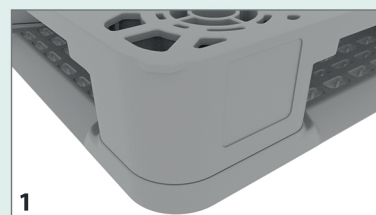

The Spanish pallet is a sustainable and efficient alternative to wood pallets in food and beverage industries. The plastic pallet is designed to convey aluminum and steel cans, glass and plastic bottles, as well as other miscellaneous rigid packages. Its structural foam injection moulded construction provides strength, durability, close tolerance, dimensional consistency and stability.

## Overview

- Smooth, all plastic construction protects product (no nails, rust or splinters)
- Manufactured in High Density Polyethylene (HDPE)
- Increased deck ventilation ideal for automated and manual washing systems
- Patented snap-fit design
- Tapered 4-way entry for easy targeting
- Environmentally friendly and 100% recyclable
